SKILLS

- HTML
- CSS, LESS & SASS
- JavaScript
- React.js
- Redux
- REST APIs
- Bootstrap 4
- GitHub Flow
- PHP
- MySQL
- Node.js
- Adobe XD/Photoshop

PROJECTS

Nasa Photo of the Day
Created With: React.js, JSX, Nasa API, Material UI, SCSS
- Use of React hooks and functional components.
- Incorporates the use of Material UI calendar.
- Performs a GET request using Axios to render the photo along with information for selected date.

GitHub Finder
Created With: React.js, JSX, GitHub API, CSS
- Created with class components and uses React lifecycle methods.
- Fetches data from my personal GitHub account via the GitHub API on initial render.
- Search functionality allows for the user to search through the API for specific accounts and directly links you to profiles.
- Profile card components also render GitHub activity.

DryMaster
Created With: HTML, CSS, Bootstrap, JavaScript and PHP
- Freelance project created for a local business.
- Relies heavily on the Bootstrap framework for styling and responsiveness.
- Website showcases the various services the company offers.
- Contact form uses PHP and JQuery to send user input to email.

EDUCATION

Lambda School (Course Overview**)** May 2019
- Further education and training with Full Stack Web Development.
- Became very familiar with the use of today's most popular languages, frameworks and libraries including Javascript, React.js, Node.js, Redux, MongoDB, Java, Python etc.
- Participated in multiple Build Weeks where we were grouped up and given specific tasks(UX, FrontEnd, BackEnd and Team Lead) to simulate the structure and communication necessary for an actual work environment.

Palm Beach Code School (Course Overview**)** November 2018
- Learned about various programming languages, frameworks, compilers and libraries.
  HTML, CSS, PHP, vanilla Javascript and Bootstrap to name a few.
- Created an online portfolio to showcase our understanding of said languages.
- Created a capstone project incorporating the use of all programming languages and concepts taught to us.

WORK EXPERIENCE

SDI TDI ERDI Stuart, FL
Web Developer *Currently Employed*
- Work with legacy code written in older versions of PHP, jQuery and Bootstrap.
- Use of time management skills to complete tickets in a timely fashion.
- In the process of integrating the use of the Laravel framework.
